SEO Intern

May 2026 – Jun 2026

- Conducted keyword research using Ahrefs and Google Ads Keyword Planner to identify search opportunities for client websites and practice projects.
- Assisted with on-page SEO tasks including metadata optimization, keyword mapping, and content structuring.
- Applied E-E-A-T principles and used Microsoft Clarity to analyze user behavior and inform SEO improvements for a personal portfolio website.

PROJECTS

FocusPen | TCN, IMU, FSR, Haptics | GitHub

- Developed a smart pen prototype using IMU sensor data and a Temporal Convolutional Network to classify writing, fidgeting, idle, and gripping behaviours.
- Integrated real-time behaviour predictions with a haptic feedback layer using LRA actuation for context-aware feedback.

PolyOCR-Bench | Python, Tesseract, EasyOCR | GitHub

- Built a modular multilingual OCR benchmarking framework comparing 6 OCR engines across text accuracy, semantic similarity, inference speed, and memory usage.
- Automated evaluation under 5 image corruption conditions with unified CSV/JSON reports and comparison plots.

UAV-Assisted Agricultural Pest Surveillance | YOLOv8, OpenCV, UAV | GitHub

- Developed a UAV-based agricultural pest surveillance system as part of a 3-person team using YOLOv8 and OpenCV for day and night monitoring.
- Trained YOLOv8 on an aerial pest dataset, achieving 85.5% accuracy across multiple insect classes.

Cooking Assistant | Flask, JavaScript, Web Speech API | Live | GitHub

- Developed and deployed a voice-controlled cooking assistant using Flask and the Web Speech API, supporting 4 voice navigation commands and recipe step tracking.
- Added automatic cooking-timer detection using 6+ regex patterns, with audio alerts and a live countdown interface.
